This is just ridiculous. Ebola isn't what we've been told, of course.

If they're really sick, they have been poisoned.

Possibly nobody is sick. It's not as if you can go and check.

But even not knowing any of that, how many people know that it has never previously been claimed that there have been Ebola cases in more than two countries at a time and that the two have always been adjacent countries?

So, why on earth would WHO feel the need to officially state that there is a "Public Health Emergency of International Concern", usually abbreviated to PHEIC, spoken as "fake"?

It is fake. All these scary virus stories are propaganda.

They really cannot help themselves, fake indeed.

If anyone doubts that blowing the doors off the pandemic preparation scam will kill it off as a weapon against humanity, this short, dramatic video confirms that this, exposing the lie, that is that pandemics don't occur because they can't occur, is arguably the single most powerful weapon we have at our disposal.

Thus, pretend allies who say “the virus question is irrelevant” are not your friends.

It’s all planned...WHO-WEF-UN

1. Make a ‘Vaccine’

2. Have a ‘Pandemic Simulation’

3. Get the Media ‘On Board’

4. Pay off the Politicians

5. Use Fear Propaganda

6. Utilize ‘Gain of Function’

7. Say there’s an ‘Outbreak’

8. Pharmaceutical Liars step up

9. Tell everyone they’ll die
